Length: 1150mm Width: 820mm
Height: 620mm Weight: 68kg

200L TANK

Length: 1200mm Width: 870mm
Height: 820mm Weight: 73kg

QUIK SPRAY®

REMOTE CONTROL RETRACTABLE HOSE REEL SYSTEMS

> Mini Quik Spray: QR50+100

THIS small 12V DC Mini Spraying System is ideally suited to for all small spraying applications. The unit is perfect for use in parks and gardens, hobby farms, pest control in and around buildings, inside nurseries and glasshouses, and any other application where only a maximum of fifty (50) metres of hose is required.

While initially designed for agricultural spraying, the mini Quik Spray™ system is also ideal for horticultural and nursery spraying because of its quiet 12V pumping system. The framework provided allows for easy mounting on a trailer, utility or an all-terrain vehicle. As with all Quik Spray™ remote controlled retractable hose reels, this unit will rewind the hose whenever a button on a small handheld transmitter is pressed. The retraction is powerful enough to rewind the full length of the hose even when full of fluid. Unlike our other Quik Spray™ models, this unit is not designed to assist the operator up hills.

The special "Supa-slip", high strength nylon hose used on all Quik Spray™ units is lightweight, kink resistant and specifically designed to withstand harsh Australian conditions.

The benefits of using a Quik Spray™ ensure it will pay for itself in a very short time!!
